

UltraSlim®

UltraSlim® is a completely noninvasive treatment that uses the unique power of red light in order to activate Lipid Metabolism – your body's natural process of removing fat. We guarantee a loss of 2" during your first treatment or your money back. These results are only possible with our proprietary combination of wavelength, dosage, and modulation.

The light of UltraSlim® decreases the fat in the cells substantially. Over the next 72 hours, the fat will continue to safely decrease, giving an additional 1.25-inch loss on average. UltraSlim® is for everyone, regardless of age, sex, or skin tone.

UltraSlim® is manufactured in the USA by
Photonica USA LLC.

UltraSlim®

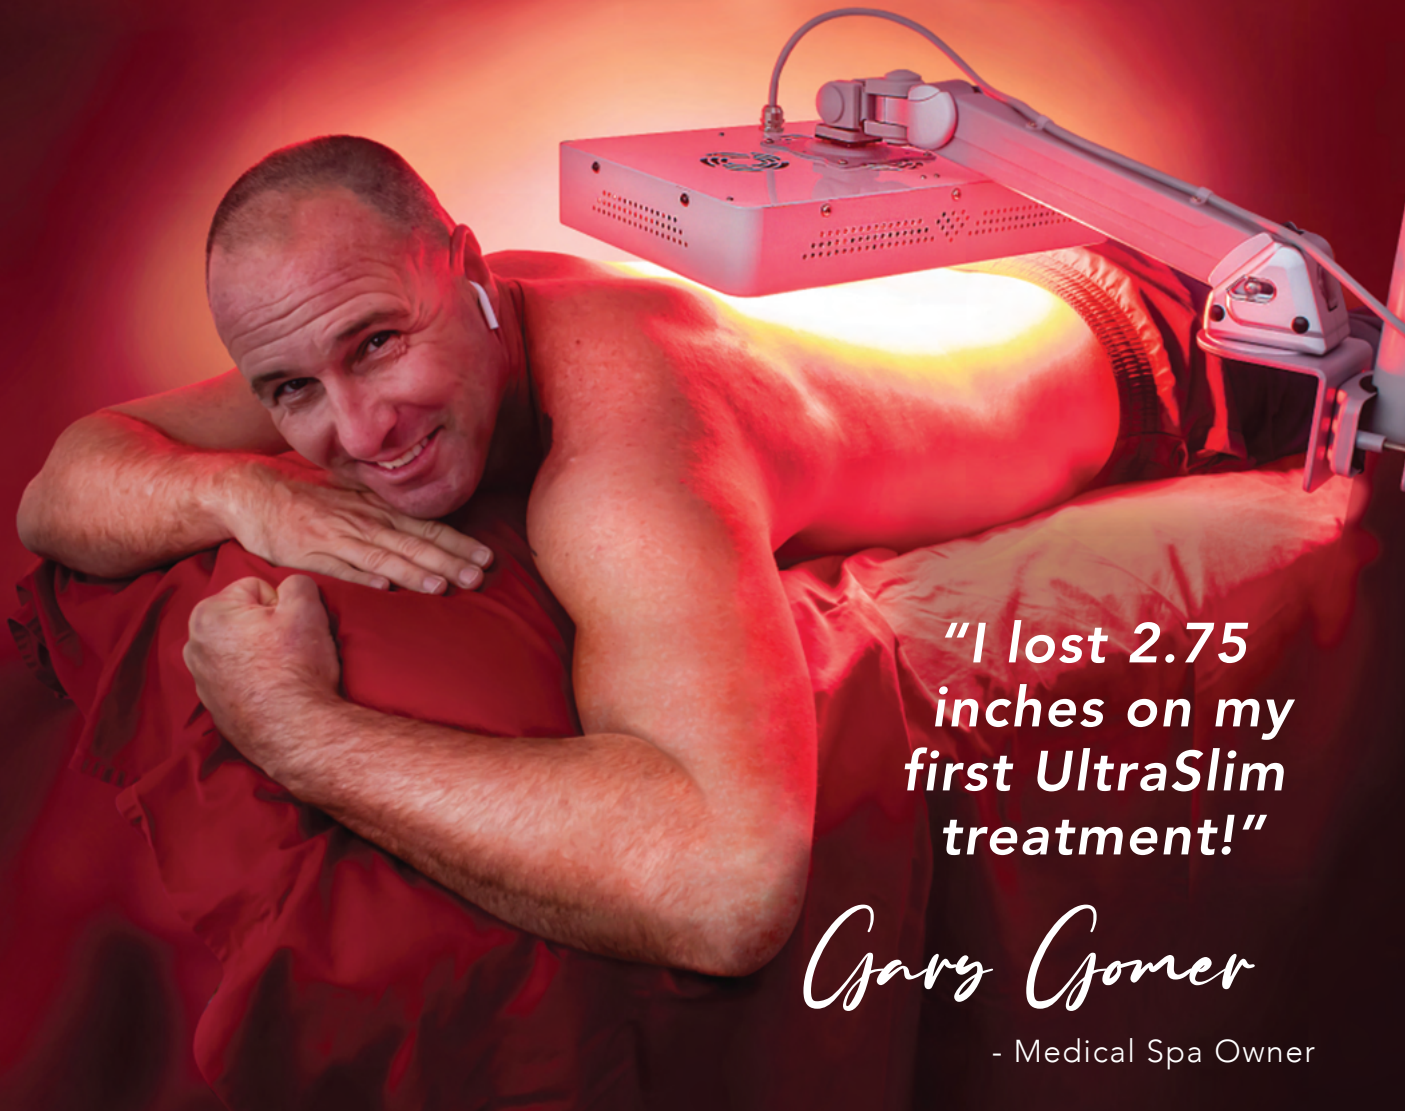

THE MOST
POWERFUL RED LIGHT
EVER

IMMEDIATE RESULTS

UltraSlim® is the only Red-Light medical device that can penetrate up to 10 cm, treating the hard, visceral fat around the muscles and subcutaneous fat. This creates a total transformation of the body including the face, neck, and torso.

Noninvasive
Effective
Safe

"I lost 2.75 inches on my first UltraSlim treatment!"
